

There are a small number of tight junctions in the village - for example around the Village Green and at the bottom of Cherry Green Lane.

When parking, residents are politely requested to give consideration to road width so that other vehicles can move through the village without damaging verges or property.

Where visitors and contractors are expected please ensure that they do the same.

The road from the A10 through the village to Great Munden and beyond, is also the route for emergency service access to the nursing home and needs space for a fire engine to pass.

Thank you
